

## Cooling tower – type CHL400

Cooling tower protects the gauge from a high temperature.

**Principle:**

Air circulation degrees the temperature in the cooling tower.

**Material:**

Body: AISI 316L (1.4404)

Capillary line: AISI 316Ti (1.4571) ... straight-through hole: 1,6 mm

**Temperature / pressure conditions:**

Medium up to 400°C / PN 400

**Dimensions:**

Length: L = 200 mm (extended on request)

Connections: G1/2" (M20x1,5 on request)

Direct mounting. The left-right union nut G1/2"L / G1/2" is included.
